

GFC4500 (Hardwick) 900mm Galvanised or Galvanised & Colour

The GFC4500 (Hardwick) from AUTOPA is a traditionally styled ornamental bollard designed to resemble its cast iron relative. The body of the bollard is manufactured from mild steel which is galvanised as standard to ensure its longevity. Cast Iron caps and rings are welded on to the steel body to complete the design. Contrasting coatings are available at an additional cost.

The bollards are available in a galvanised and galvanised and coated finish. RAL numbers must be specified at time of order. Eyelets, hooks and chains can be added to these bollards to complete the decorative effect. Please ask for more information.

Part Number	Description	Lift Weight (kg)	Weight (kg)
138 120 321	Galvanised - Concrete In		13kg
138 120 322	Galvanised & Black - Concrete In		13kg
