

## Environmental Policy

Autopa Limited specialises in the manufacture and marketing of street furniture products that are produced at its plant in Rugby, Warwickshire. The product range is sold under the Trademarks of 'AUTOPA' for Hinged Parking Posts; Bollards; Perimeter Barriers and Access Control Products and 'VELOPA' for Bicycle Racks; Bicycle Ramps; Bicycle and Smoking Shelters and Security Rails.

Autopa Ltd recognises its obligations to comply with the law and carry out its business in as environmentally sound a manner as possible, whilst producing products that are reliable and of the highest quality, in order to meet its responsibilities to customers, employees, neighbours and the natural environment. We are committed to promoting and maintaining an environmental policy to ensure that the impact of our operations on the environment is reduced to as low a level as is practically and environmentally feasible.

Our business activities impact on the environment in a number of ways and we are committed to reducing the effect of these where possible. In particular we are committed to;

*Operating and continually improving an Environmental Management System to ISO 14001*  
*Regularly reviewing all stages of our operations in order to minimise our impact on the environment and to prevent pollution where practicable*  
*Complying with relevant environmental legislation and regulations, both national and local, and the environmental requirements of our customers and any other requirements that are applicable*  
*Improve our resource efficiency with endeavours to use less materials, energy, water and fuel*  
*Trying to reduce the amount of waste produced and disposing of such waste in a safe and responsible way, re-using or recycling where applicable*  
*Undertaking to establish environmental training needs within the company and maintain training programmes*  
*Ensuring that suppliers and contractors appreciate and work towards this environmental ethos.*

We will set objectives and targets to achieve our aims. Our attention is currently focussed on;

*Minimising the use of packaging by reusing or recycling*  
*Monitoring our use of water and energy*  
*Correct storage of hazardous materials on site*

This policy is communicated to all persons working for or on behalf of the organisation and is freely available to the public. The commitments in this policy will be managed, documented and delivered through our environmental management system. Our compliance and progress will be reviewed at least annually through Management Meetings and recorded both in minute format and in the Business Operating Plan.
