

The Type C Cycle Rack is a floor mounted cycle rack based upon the Model R Holder. The Type C offers a high cycle parking density, with cycle stands on both sides. The double sided holders combined ensure that cycles are parked 305mm apart (typical parking distance for a Sheffield Cycle Stand is 500mm).

The practical and durable nature of the Type C Cycle Rack ensures that the rack is suitable for all environments where high density, double sided cycle parking is required.
