

# Cycle Security Rail Galvanised

An extremely simple and effective way to secure a bicycle, the Cycle Security Rail is fabricated from 16mm diameter mild steel bar with two flanges for attaching to a suitable wall.

The Cycle Security Rail is particularly suited to domestic or internal environments, yet the galvanising will ensure it retains its finish for years, no matter where it is used. The Cycle Security Rail is also suitable for securing groundsman/garden tools.

<u>Part Number</u>	<u>Description</u>	<u>Weight (kg)</u>
138 200 201	Cycle Security Rail	2kg

## Product details

- 16mm diameter bar
- 830mm length
- 95mm height
- Round flange plate – 80mm x 5mm
- Each rail requires 4 x 8mm bolts

## Installation & use

Position the rail to the required height (approximately 800mm for bicycles, recommended.)  
Mark and drill holes in suitable concrete/brick wall. Bolt Cycle Security Rail to wall.  
This product is guaranteed for 12 months (if installed and used correctly).
