

Model R Cycle Holder Galvanised

The simplest cycle holder, a familiar sight throughout the UK, allows the tyre of the bicycle to be supported. The stand is fixed to a suitable wall and can be spaced at no less than 610mm between holders for cost effective cycle parking. The Model R is available in either 90° or 45° versions which allow for cycles to be parked either head-on or angled.

The practical and durable nature of the Model R cycle holder ensures it has been consistently specified and used since its introduction in the 1950's.

<u>Part Number</u>	<u>Description</u>	<u>Weight (kg)</u>
138 200 001	Model R90°	2kg
138 200 002	Model R45°	2kg

Product details

- 12mm diameter bar
- 346mm x 90mm x 212mm (height x width x depth)
